CHAOS
INTELLIGENCE
PATTERNS

Intelligence loves patterns

```clojure
;; Define the subject as list of notes
(def subject ["A" "D" "E" "A"])

;; Define generic procedure with multi arity options
(defmulti play (λ [pattern transformation &args] transformation))

;; Returns subject, does not modify
(defmethod play :default [_ _] subject)

```

0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144

Intelligence loves patterns

```clojure
;; Define the subject as list of notes
(def subject ["A" "D" "E" "A"])

;; Define generic procedure with multi arity options
(defmulti play (λ [pattern transformation &args] transformation))

;; Returns subject, does not modify
(defmethod play :default [_ _] subject)

;; Reverses subject
(defmethod play :retrograde [_ _] (reverse subject))

;; Changes the key
(defmethod play :transpose-minor [_ _] (map #(str % "m") subject))
```

0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144

Intelligence loves patterns

```clojure
;; Define the subject as list of notes
(def subject ["A" "D" "E" "A"])

;; Define generic procedure with multi arity options
(defmulti play (λ [pattern transformation &args] transformation))

;; Returns subject, does not modify
(defmethod play :default [_ _] subject)

;; Reverses subject
(defmethod play :retrograde [_ _] (reverse subject))

;; Changes the key
(defmethod play :transpose-minor [_ _] (map #(str % "m") subject))

;; Creates crab canon
(defmethod play :mobius [_ _]
  (let [half (quot (count subject) 2)        ;; find half of the subject
        first-half (subvec subject 0 half)   ;; create list of the first half
        second-half (reverse (subvec subject half))] ;; create list of second half, reverse
    (concat first-half second-half first-half))) ;; combine into continous mobius strip

```

```clojure
;; Define the subject as list of notes
(def subject ["A" "D" "E" "A"])

;; Define generic procedure with multi arity options
(defmulti play (λ [pattern transformation &args] transformation))

;; Returns subject, does not modify
(defmethod play :default [_ _] subject)

;; Reverses subject
(defmethod play :retrograde [_ _] (reverse subject))

;; Changes the key

"VOUCH!"
BACK TO THE STORY

Engineering process and policies don't seem to be written down anywhere?

1

Having documents, tasks, and timelines all in one place (Notion)

1

As the company grows, it'll be harder to keep tabs on what's happening throughout the company and know what others are working on.

	☑	☑	☑	explains everything from installing it, language concepts, and lots of examples how to use it	
	☑	☑	☑	It combines prose with a browser-based shell that allows for immediate interaction with the system. It has examples and is visually attractive	
	☑	☑	☑	- Beginner friendly - Clear distinction between platform SDKs and API docs - Easy to read endpoints and expected response (would love to see expected responses in our docs)	
	☑	☑	☐	☑	It is a really good way to get started with something (in this case Clojure) immediately. This could be something that we could build for on-boarding developers and let them experience what it means to develop with our tech.
Cypress E2E Testing	☑	☑	☐	☑	Quick to "hello world", easy to reference, good videos	I don't remember its been a w
Clojure Community Docs	☐	☑	☐	☑	- It's backed by code, so it's tracked (and reviewed) in git; - Highly searchable; - Has examples; - Has "See also" links to try to find similar functions.	It lacks a high level explanatio
Clerk	☐	☑	☐	☑	More as a maybe tool for implementing something similar to the Stripe docs. It looks good, the language is familiar to most of of the team, it's flexible.	
Reframe CLJS	☐	☑	☐	☑	Clear, entertaining, easy to read	I wish examples were better, i
Google Spreadsheet functions	☐	☐	☐	☑	- It's backed by code, so it's tracked (and reviewed) in git; - Highly searchable; - Has examples; - Has "See also" links to try to find similar functions.	It lacks a high level explanatio

The Miller Principle

11 Jul 2007

I made this up years ago but it holds today as much as ever:

> **The Miller Principle**: No one reads anything.

This principle applies to the following:

- User documentation
- Specifications
- Code comments
- Any text on a user interface
- Any email longer than one line

I had some other principles too but I figured no one would read them…. :)

Missed Connections

- 8 SESSIONS
- 4 HOURS
- 3-6 PEOPLE PER SESSION
- 45 MIN TALK ON DIATAXIS
- 3 GROUP ACTIVITIES
- RECURSIVE IMPROVEMENT VIA FEEDBACK SURVEY

Intention:

We are here to participate in an experience that gives us a **shared understanding** of how to produce high quality technical documentation.

How To Recognize Success?

0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144

☑ Shorter Time onboarding

feat: implement new transport ble #244

Merged V1pi merged 56 commits into `main` from `new-transport-ble` on Mar 13

Conversation 1 | Commits 56 | Checks 2 | Files changed 14 | +92 −77

Assets / Resources

status	Aa Resource	Description
Stable	Reference - BLE Transports for React Native	BLE Transports for React Native - This document is for anyone who is building a React Native app and wants to use BLE to communicate with AON/FOB (Vouch Devices).
Stable	Reference - BLE Transports	BLE Transports API Reference - This document is for anyone who wants to use BLE to communicate with AON/FOB (Vouch Devices). It is also useful for reference for BLE Developer.

How To DIY?

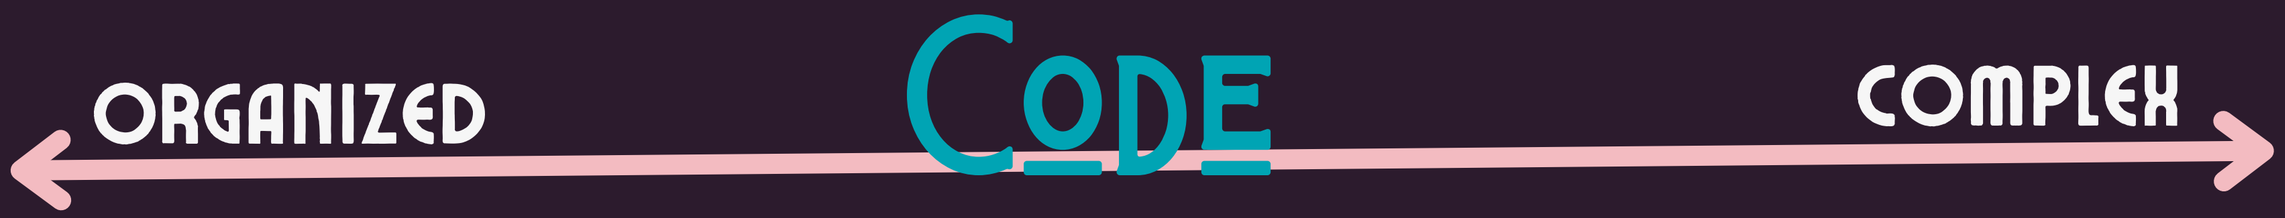
CONSIDER THE OUTER MESSAGE YOU'VE PROVIDED
AND THE INNER MESSAGE YOU ARE
TRYING TO COMMUNICATE

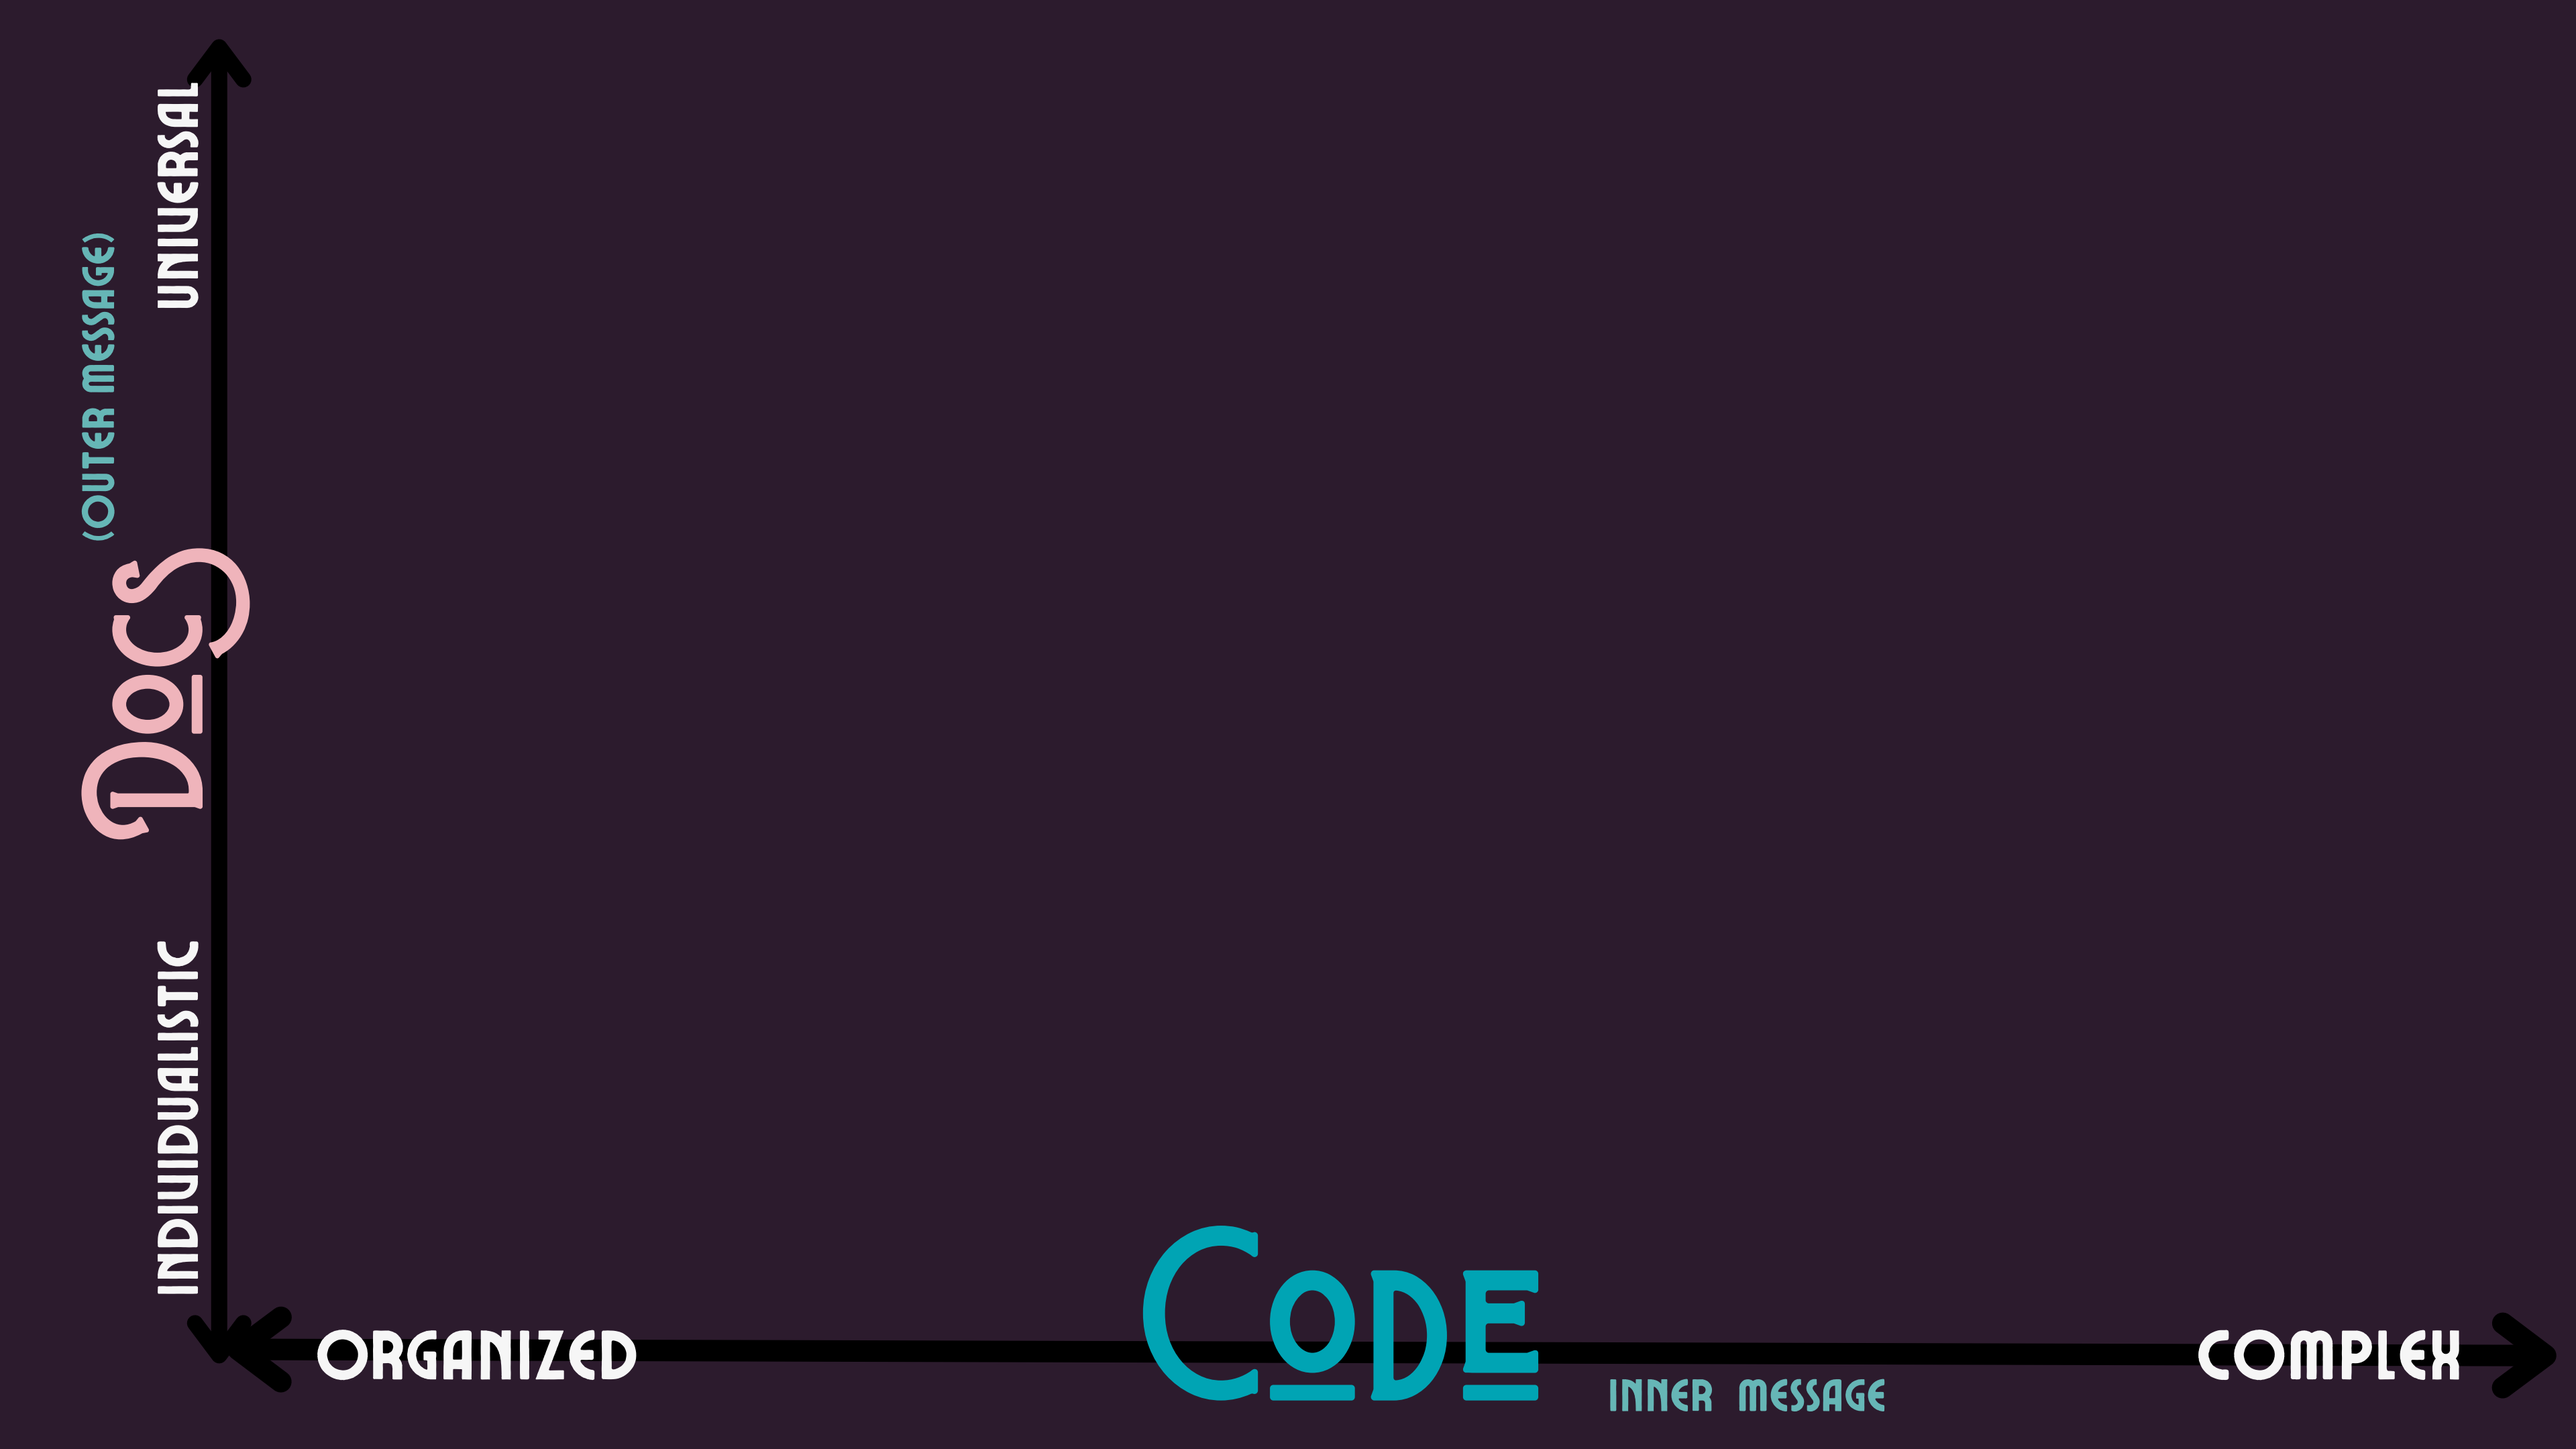
Outer Message

1. Consider your team documentation practices
    a. are your technical artifacts ***on the same page or playing out of tune***?
        i. How good is your **Outer Message**?

Inner Message

1. Consider your code
    a. is it *conventional?*
    organized?
    or *complex?*





UNIVERSAL
